

Modulbezeichnung: Fundamentals of Micro- and Nanostructure Research **10 ECTS**
MWT (IMN_M1/6/8-MWT)

(Fundamentals of Micro- and Nanostructure Research MWT)

Modulverantwortliche/r: Erdmann Spiecker

Lehrende: Mingjian Wu, Erdmann Spiecker, Stefanie Rechberger, Johannes Will, Benjamin Apeleo-Zubiri

Startsemester: WS 2021/2022

Dauer: 2 Semester

Turnus: jährlich (WS)

Präsenzzeit: 120 Std.

Eigenstudium: 180 Std.

Sprache: Deutsch und Englisch

Lehrveranstaltungen:

Transmissionselektronenmikroskopie in Materialforschung und Nanotechnologie 1 (WS 2021/2022, Vorlesung, 2 SWS, Erdmann Spiecker)

Übungen zur Transmissionselektronenmikroskopie 1 (WS 2021/2022, Übung, 2 SWS, Mingjian Wu et al.)

Transmissionselektronenmikroskopie in Materialforschung und Nanotechnologie 2 (SS 2022, Vorlesung, 2 SWS, Erdmann Spiecker et al.)

Übungen zur Transmissionselektronenmikroskopie 2 (SS 2022, Übung, 2 SWS, Mingjian Wu et al.)

Inhalt:

The module deals with the fundamentals of micro- and nanostructure research with the focus on today's state-of-the art capabilities of transmission electron microscopy in the investigation of materials down to the atomic scale. The module begins with the basic physics of fast electrons, their generation and guidance by electromagnetic fields and their interaction with matter in the specimen and the detector. Afterwards various imaging (BF, DF, HRTEM, STEM), diffraction (ED, CBED), spectroscopic (EDXS, EELS, EFTEM) and 3D (ET) techniques including their applications to current research topics will be introduced. The aim is always to give insight into both the contrast mechanisms and physics of as well as the achievable information delivered by the different techniques.

Lernziele und Kompetenzen:

Die Studierenden

Fachkompetenz

Wissen

- Basic concepts of the interaction of fast electrons with matter
- Introduction of TEM components and their functionality
- Knowledge about the application of high resolution techniques for nanomaterials

Verstehen

- In-depth understanding of microscopy techniques for micro- and nanostructure research
- In-depth understanding of basic and advanced imaging, diffraction and spectroscopic TEM techniques and their application to material science

Anwenden

- Hands-on-training on modern analysis software for EM applications
- Each topic will be accompanied with suitable exercises

Analysieren

- Insight into the structure property relationship of materials

Studien-/Prüfungsleistungen:

Fundamentals of Micro- and Nanostructure Research (Prüfungsnummer: 62811)

(englische Bezeichnung: Fundamentals of Micro- and Nanostructure Research)

Untertitel: MWT Prüfungsleistung, mündliche Prüfung, Dauer (in Minuten): 30

Anteil an der Berechnung der Modulnote: 100%

weitere Erläuterungen:

Prüfungssprache nach Wahl der Studierenden

Prüfungssprache: Deutsch oder Englisch

Erstabledung: SS 2022, 1. Wdh.: WS 2022/2023

1. Prüfer: Erdmann Spiecker
